Online shoppers behave differently after chatting with staff of the opposite gender, new research shows – here's why businesses should be paying attention

Not even online shopping is free from gender bias.

Author:John Doe

Think you've decided what to buy? Actually, your brain is still deciding – even as you put it in your basket

Our research shows our brains are still evaluating our decisions even as we act them out. Better awareness of what influences last-minute decision-making can help us make better choices.
